Full-Stack Developer with **4+ years of experience** building scalable web applications using **React, Next.js, Node.js, and NestJS**. Experienced in developing **logistics, insurance, enterprise, and iGaming platforms**, with a focus on backend services, real-time features, third-party integrations, performance, and scalable architecture.

Skills

- JavaScript • TypeScript • React.js • Next.js • Node.js • NestJS • Express.js • REST APIs
- Tailwind CSS • ShadCN • PostgreSQL • MongoDB • Redis • TypeORM • Authentication • RBAC
- Docker • AWS (EC2, S3) • PWA • Git • Jest • GitHub Actions
- Languages: English • Hindi • Gujarati

Professional Experience

- | | | | |
|---|--------------------------|-----------------------------|--------------------------|
| Nuestack Solutions | SDE 2 | <i>Remote - Texas, USA</i> | 12/2025 - Present |
| <ul style="list-style-type: none">• Rebuilt a US-based online casino platform using NestJS, React, and PostgreSQL with a modern architecture..• Developed full-stack features across customer and admin applications, with Authentication, RBAC, and customer support functionality.• Integrated third-party services including game aggregators, IDComply for identity verification, and GeoComply for geolocation compliance• Implemented core platform features such as daily bonuses, jackpots, vaults, rewards, and customer support.• Built scalable backend services using BullMQ, Redis, and Docker to support asynchronous processing and improve application reliability.• Implemented PWA capabilities for Gold Machine, enabling an installable, app-like experience across devices. | | | |
| Seven Square Technosoft | Software Engineer | <i>Ahmedabad, GJ, India</i> | 02/2023 - 12/2025 |
| <ul style="list-style-type: none">• Developed an insurance case management portal with dynamic roles, reports, and multi-stage workflows using NestJS.• Built a multi-language CMS with user-defined fields and flexible content types using NextJS & PostgreSQL.• Delivered logistics tracking and billing tools with real-time updates via Socket.IO, cutting manual tracking efforts by over half.• Created a document mapping tool using React, Tailwind & Konva for editing and data entry directly on PDFs.• Worked on an AI-based summary tool integrating OpenAI & Deepgram for transcription and video/audio summarization.• Developed a shipping management system with Firebase & NextJS, featuring granular field-level access controls.• Designed a salon booking system with real-time availability and conflict prevention using NuxtJs & Firebase.• Led and coordinated a development team for two major projects from planning to delivery. | | | |
| Provitious Technologies | Software Engineer | <i>Ahmedabad, GJ, India</i> | 05/2022 - 02/2023 |
| <ul style="list-style-type: none">• HRMS & Project Management System: Started my career working with ReactJS and Redux, building a dynamic HRMS with attendance, leave, and onboarding modules. Also developed an internal task management tool with a Kanban board (react-dnd, JIRA-style) that became the go-to system for multiple ongoing projects. | | | |

Education

- | | | | |
|-------------------------------------|-------------------------------|----------------------|--------------------------|
| GEC Modasa- GTU
7.83 CGPA | Bachelor of Technology | <i>Modasa, India</i> | 07/2017 - 04/2021 |
|-------------------------------------|-------------------------------|----------------------|--------------------------|

Projects

- | | |
|---|----------------------------------|
| Nirmaan — AI Floor Plan Generator
User Frontend • Admin Frontend
Built an AI floor-plan SaaS that turns Gujarati/Hindi/Hinglish/English voice or text into structured plan JSON with canvas preview, PDF export, chat history, and token usage—using React (Vite), NestJS, TypeScript, PostgreSQL, and Konva , plus Gemini, Sarvam AI, Razorpay , and Resend . | <i>Personal • Live</i> |
| Cake N Joy — Bakery Franchise Management Portal
Developed the entire inventory and POS platform using Next.js, React, MongoDB, and Socket.IO for 30+ branches , with real-time tracking, billing, and analytics that reduced manual work by 85% . | <i>Personal • Client Project</i> |
